

## R&D Scientist - Heterogeneous Catalysis

Do you enjoy being a part of a research project throughout its implementation?

Do you long to realize yourself and be adequately rewarded for it?

Are you interested in catalysis?

Then we are looking for you.

### Who we are?

We are a small innovative company that focuses on the development and production of custom catalysts for the chemical and petrochemical industries for customers in Europe, Asia and the USA.

We are doing well, we are successfully growing, we are expanding our range of products and services. To do this, we need capable people. Now, for example, R&D Scientist.

### Required:

- Master degree in chemistry
- Previous experience with the development, production or testing of catalysts
- Independence at work from the design of the experiment to its implementation and interpretation of results
- Ability to present the achieved results
- A team player in a small team
- Knowledge of computer control systems is an advantage
- Enjoyment of innovating existing solutions
- Knowledge of English (German, French, Polish, Russian an advantage)
- Driving license B

### Offer:

- Work on interesting international projects in the field of catalyst development
- Comfortable working environment in modern laboratories of VTP Kralupy
- Work in a great team
- Practical application of theoretical knowledge
- Full-time work
- Appropriate financial assessment
- Employee benefits (performance bonuses, meal vouchers, sick days)
- Interesting opportunities for professional growth

If you meet the above requirements and are interested in the position, please send your CV and motivation letter to [career@ranido.cz](mailto:career@ranido.cz)
