

PUSHING INNOVATION IN CATALYSIS

We are a research and development company working closely with industrial partners, universities, and research institutes across Europe.

CUSTOM CATALYST MANUFACTURING

Do you need to upscale the catalyst synthesis from the lab to commercial scale? Ranido will guide you through the upscale process. We can assist you with the production of any desired amount from grams to tons based on your product specification or recipe.

INDUSTRIAL APPLICATIONS

Ranido industrial catalysts power hundreds of processes across a wide range of industries. All our catalysts are engineered for optimal performance and selectivity to help our customers run their processes more efficiently, cost-effectively and sustainably.

RESEARCH & DEVELOPMENT

Up-to-date R&D infrastructure and strong background in catalysis allow us to design, synthesize, characterize and test new catalysts.

Assisting engineering companies, catalyst users and technology providers to develop new catalysts for their applications is our core competence and passion.
